RHYTHM GANDHI

Chandigarh (UT), India | +91-7696361624 | rhythmgandhi2005@gmail.com | LinkedIn | GitHub

Professional Summary

Computer Science (AI & ML) undergraduate developing database-backed applications and AI-enabled workflows using Python, SQL, and React. Project experience includes document processing, API integration, automated validation, and role-based systems, supported by a software engineering internship and leadership of a student-led educational initiative.

Education

Vellore Institute of Technology – Bhopal, India Expected 2027
Bachelor of Technology in Computer Science and Engineering (AI & ML) *CGPA: 8.46*

Technical Skills

Conversational AI: Prompt Engineering, LLMs, NLP, Intent Routing, Contextual Memory, Emotion Classification
Retrieval & ML: RAG, Embeddings, Vector Search, PyTorch, Hugging Face Transformers, OCR, Model Quantization
Languages & Backend: Python, SQL, TypeScript, FastAPI, Flask, REST APIs, WebSockets
Databases & Frontend: PostgreSQL, pgvector, SQL Server, React.js, Next.js
Models & Tools: OpenAI API, Mistral-7B, RoBERTa, OpenClaw, Pytest, Git, OAuth 2.0

Projects

LawBridge – Multi-Agent Legal AI System | *Python, FastAPI, React, Next.js, OpenClaw, RAG*

- Orchestrated 5 specialized AI agents through OpenClaw semantic routing to handle distinct legal-assistance workflows.
- Engineered a 3-stage OCR, NLP, and RAG pipeline to extract document content and retrieve relevant statutes through vector search.
- Developed role-based React dashboards with reusable document-analysis components, integrating backend services through REST and WebSocket APIs.

Saanjh – AI-Powered Skincare Intelligence Platform | *Python, FastAPI, React, PostgreSQL, pgvector*

- Built a recommendation platform combining 3 information sources: user skin profiles, OCR-extracted ingredient lists, and product data.
- Implemented ingredient normalization, avoid-list validation, and compatibility rules to identify conflicts and calculate suitability scores.
- Validated outputs across 4 test areas: retrieval relevance, recommendation grounding, conflict detection, and scoring consistency.
- Connected OpenAI embeddings with PostgreSQL pgvector to retrieve ingredient information and ground recommendations in product data and user context.

Samantha AI – Emotion-Aware Conversational Assistant | *Python, Flask, React, PyTorch, Mistral-7B, RoBERTa*

- Designed a speech pipeline with 2 engines, voice input and output, intent routing, contextual memory, and response caching.
- Integrated 2 NLP models: Mistral-7B for response generation and RoBERTa for emotion classification, served through Flask APIs and React.
- Enabled email and scheduling workflows through 2 Google service integrations, Gmail and Calendar, using OAuth 2.0.
- Configured 4-bit NF4 quantization and mixed-precision inference to run the 7B-parameter model within 6 GB of GPU memory.

Internship Experience

Advanced Software Engineering & Development Internship May 2026 – Jul 2026
MPOnline Limited

- Delivered a Library Management System using ASP.NET Core MVC, Entity Framework Core, and SQL Server, with book CRUD, search, pagination, and borrow-and-return workflows.
- Managed requirements, database design, implementation, and testing across 8–10 modules, including availability tracking, duplicate-return handling, and role-based authorization.

Leadership & Volunteering Experience

Head of Department (HOD) – PAHAL NGO Initiative Oct 2023 – Oct 2025

- Directed an educational initiative for children of construction workers, coordinating volunteers, outreach activities, and university leadership.

Volunteer – National Service Scheme (NSS) Aug 2024

- Supported a community tree-plantation initiative in collaboration with peer volunteers and local stakeholders.

Certifications & Achievements

ServiceNow Administration Fundamentals On Demand – ServiceNow Jun 2026
Certified Ethical Hacker (CEH v12) – EC-Council Mar 2025
Google Olympics – Google Developer Group, VIT Feb 2025
Certificate in Software & Data Processing (NIELIT O Level in Core Python) – NICT Tech Jul 2024
